Grand Slam™ Heater Package Redesigned for 50% Reduction in Maintenance

September, 2011

Stedman has released the GEN II Grand Slam™ heater package. In response to customer feedback the redesign cuts heater maintenance time by up to 50%.

Stedman's groundbreaking heating system has saved industries millions of dollars since its introduction in 1998 ~ improving the crushing efficiency for wet & sticky materials.

- The new design heaters and guards use existing control panels
- Steel guards with AR steel cladding on front apron guard
- Heater maintenance time cut by 50%
- Retrofits available for existing machines
